

Mybox Ai

AI-powered visual inventory
system for real-world assets.

Know exactly what you own,
where it is, and who moved it.

The Problem: Where is it, who has it, and how many do we have?

Poor inventory tracking leads to:

- Lost or duplicated assets
- Wasted time and labor
- Unnecessary re-purchasing
- Operational breakdowns in fast-moving environments

Existing tools are too rigid, too complex, & not designed for how people actually work.

The Solution

Mybox Ai is a **flexible, AI-powered inventory platform** designed for real-world workflows.

- Capture inventory via photos, voice, or manual input
- Automatically generate structured systems using OCR + database logic
- Enable multi-user access for teams, turnover, and contractors
- Track assets across locations, storage, and transport
- Adapt to existing workflows or build new ones from scratch

It creates structured systems effortlessly—without forcing rigid labeling upfront.

Why Now

- AI + OCR + mobile cameras make real-time inventory tracking possible
- Growth in storage, logistics, and mobile operations
- Rising demand for **simple, flexible tools vs. enterprise systems**
- Increasing fragmentation of teams (contractors, freelancers, operators)

Opportunity: Millions of users managing physical assets without good systems

- U.S. self-storage industry: **\$11B+ annually**
- 1 in 6 Americans uses storage
- Additional markets:
 - Film & production crews
 - Touring & festivals
 - Moving & logistics
 - Seasonal and equipment-based businesses

Product Status & Traction: Working MVP demo + defined workflow

- Built independently with <\$100/month burn
- Early user interest + beta testers
- Financial model, GTM strategy, and pitch materials completed

Business Model: Subscription-based SaaS (~\$19.99/month)

- Premium features:
 - OCR + automation + multi-user logins
 - AI-powered smart layout designs
 - Custom templates and workflow adaptations per business
- Future revenue:
 - B2B partnerships
 - Licensing through storage & logistics companies

Go-To-Market

- Direct acquisition via:
 - Reddit, niche communities, and industry channels
 - Social content demonstrating real workflows
- Expansion through:
 - Storage companies (Extra Space Storage)
 - Label and Printing Partnerships (Avery)
 - Moving/logistics providers (U-HAUL)
 - Container & shipping suppliers wholesalers (Grainger, ULINE)
 - Event and production partnerships (Live Nation)

Competitive Advantage

- Designed from real-world dynamic asset tracking experience (film industry)
- Not just storage—movement-aware inventory system
- Flexible workflows vs. rigid enterprise tools
- Built for fragmented teams: contractors, operators, and small businesses

Founder

Nichole Wleklinski

- MBA Candidate
- Background in film production asset management
- Full-stack, AI-assisted builder (Cursor, Supabase, Xcode)

(Pre-Seed)

Raising: \$50K–\$250K

- Product development (AI + backend)
- Security + infrastructure
- Early user acquisition
- Partnership development

Exit Strategy

Acquisition by strategic players in storage, logistics, retail, or media (e.g., U-Haul, Container Store, enterprise platforms)

Timeline: 3–10 years
